DETAILED ACTION

Allowable Subject Matter

Claims 1-25 are allowed.

After reviewing the cited information disclosure statement, the international search report filed on August 22, 2005 and conducting a search none of the searched and cited prior arts alone or in combination discloses the claimed phase-change heat exchanger having the structural combination of independent claims 1 and 16, in particular having the conduits and foam structure in thermal contact, where the foam structure includes open cells with a phase-change material within the open cells.

The cited reference to FR-A-2 831 950 of the international search report does describe a conduit (6), a foam structure (6a) and a phase change material (PCM), however after carefully reviewing the specifications and the figures; the PCM is enclosed within envelope (2) and not within the foam structure (6a) as required by claims 1 and 16.
